

AMENDMENTS TO THE CLAIMS

Please amend claim 5 as follows and cancel claims 1-4 and 7-9 without prejudice.

Claims 1-4 (Cancelled).

5. (Currently Amended) A website browsing system, comprising:

a communication network;

a wireless base station connected to said communication network;

a website, making available image data via said communication network;

a facsimile connectable to said communication network and to a telephone line, which in a case in which a ~~priority~~ previously specified URL of said website is sent from a predetermined URL transfer terminal, in accordance with said URL, accesses said website, receives said image data from said website, converts said image data to facsimile communication data, and outputs said data; and

a portable terminal, connectable to said communication network via said base station, which sends a URL of said website selected by a user to said facsimile via said telephone line.

6. (Original) A website browsing system, comprising:

a communication network;

a wireless base station connected to said communication network;

a website, making available image data via said communication network;

a facsimile connectable to said communication network and to a telephone line, which in a case in which a subject of an electronic mail sent thereto is a URL of said

website, accesses said website in accordance with said URL, receives said image data from said website, converts said image data to facsimile communication data, and outputs said data; and

a portable terminal, connectable to said communication network via said base station, which sends a URL of said website selected by a user as a subject of an electronic mail to said facsimile.

Claims 7-9 (Cancelled).

10. (Original) A facsimile connectable to a communication network and to a telephone line, which in a case in which a URL of a website is sent from a pre-specified URL transfer terminal, accesses said website in accordance with said URL, receives image data from said website, and converts said image data to facsimile communication data.
